Professional Summary

Computer Science graduate (June 2026) specializing in front-end web development with **React.js**, **JavaScript (ES6+)**, **HTML5/CSS3**, and **Tailwind CSS**. Experienced in building responsive, reusable UI components and translating design wireframes into functional, production-ready interfaces, alongside working knowledge of Node.js and REST API integration between frontend and backend. Comfortable in sprint-based, code-review-driven teams, with strong written and verbal communication skills and a fast, feedback-driven learning curve.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Chart.js
Backend & APIs: Node.js, Express, REST APIs
Databases: Firebase Firestore, SQL
Languages: Java, Python, C, JavaScript, SQL
Tools & Platforms: Git, GitHub, VS Code, Vite, Firebase, Google Colab
AI/ML (Additional): Hugging Face LLMs, Prompt Engineering

Experience

Web Development Intern Jul. 2025 – Oct. 2025
VaultOfCode *Remote*

- Built **8+** responsive web pages in React.js by translating design mockups into reusable UI components, reducing duplicate implementation and improving interface consistency across the application.
- Engineered a React.js certificate-generation module that dynamically rendered recipient data into reusable templates and exported downloadable image/PDF certificates, replacing a manual workflow.
- Implemented a Tailwind CSS design system across **10+** pages with reusable utility-first styling patterns, standardizing frontend development and accelerating feature delivery.
- Developed **5+** shared, responsive React components following clean, well-documented coding practices, improving maintainability and reducing repetitive frontend code.

Gen AI Trainee Jun. 2024 – Jul. 2024
Lawazia Tech *Remote*

- Iteratively improved an AI chatbot's response quality by testing **10+** prompt variations across **5+** feedback-driven cycles, strengthening debugging skills and clear technical communication with the team.
- Designed and refined data models across **2+** entities to support structured, context-aware information retrieval and evaluation.
- Evaluated chatbot outputs across **3+** test scenarios, applying an iterative, feedback-driven approach to steadily improve solution quality.

Projects

LocalBizMarket | *React.js, Node.js, Firebase Firestore, Tailwind CSS, Chart.js* | View | GitHub

- Built a responsive React.js and Tailwind CSS frontend for a full-stack platform for discovering and virtually investing in local businesses, integrating secure Firebase authentication, role-based access control, and RESTful APIs.
- Designed LocalCoin (LCO), a virtual currency system, alongside a trust/reputation scoring model to simulate realistic investment decisions across platform users.
- Built real-time analytics dashboards with Chart.js, translating platform data into clear, interactive visualizations for investment tracking and business performance insights.

DockChat | *React, Python, FastAPI, LangChain, ChromaDB, Ollama* | GitHub

- Built the React frontend for a RAG-based document Q&A system supporting 5+ PDFs, integrating with a FastAPI backend over REST APIs; achieved sub-2s response time and cut manual lookup time by 60% for 15+ researchers.
- Collaborated on iterative testing across 12 query patterns and 4 debugging cycles, tuning prompts and chunking strategy using pass-rate and latency metrics; improved answer accuracy from 68% to 84%.

Education

Jharkhand University of Technology Aug. 2022 – May 2026
B.Tech in Computer Science and Engineering *Ranchi, Jharkhand*

- Relevant Coursework: Data Structures & Algorithms, Problem Solving, Databases, Web Development

Certifications & Activities

TCS iON Career Edge | Soft Skills Program Dec. 2024 – Jan. 2025

- Completed a structured professional-readiness program covering workplace communication, teamwork, and career-readiness skills.

C++ DSA Bootcamp | Problem Solving and DSA Implementation Nov. 2024

- Completed an intensive bootcamp focused on data structures, algorithms, and problem-solving in C++.
